OUR APPROACH

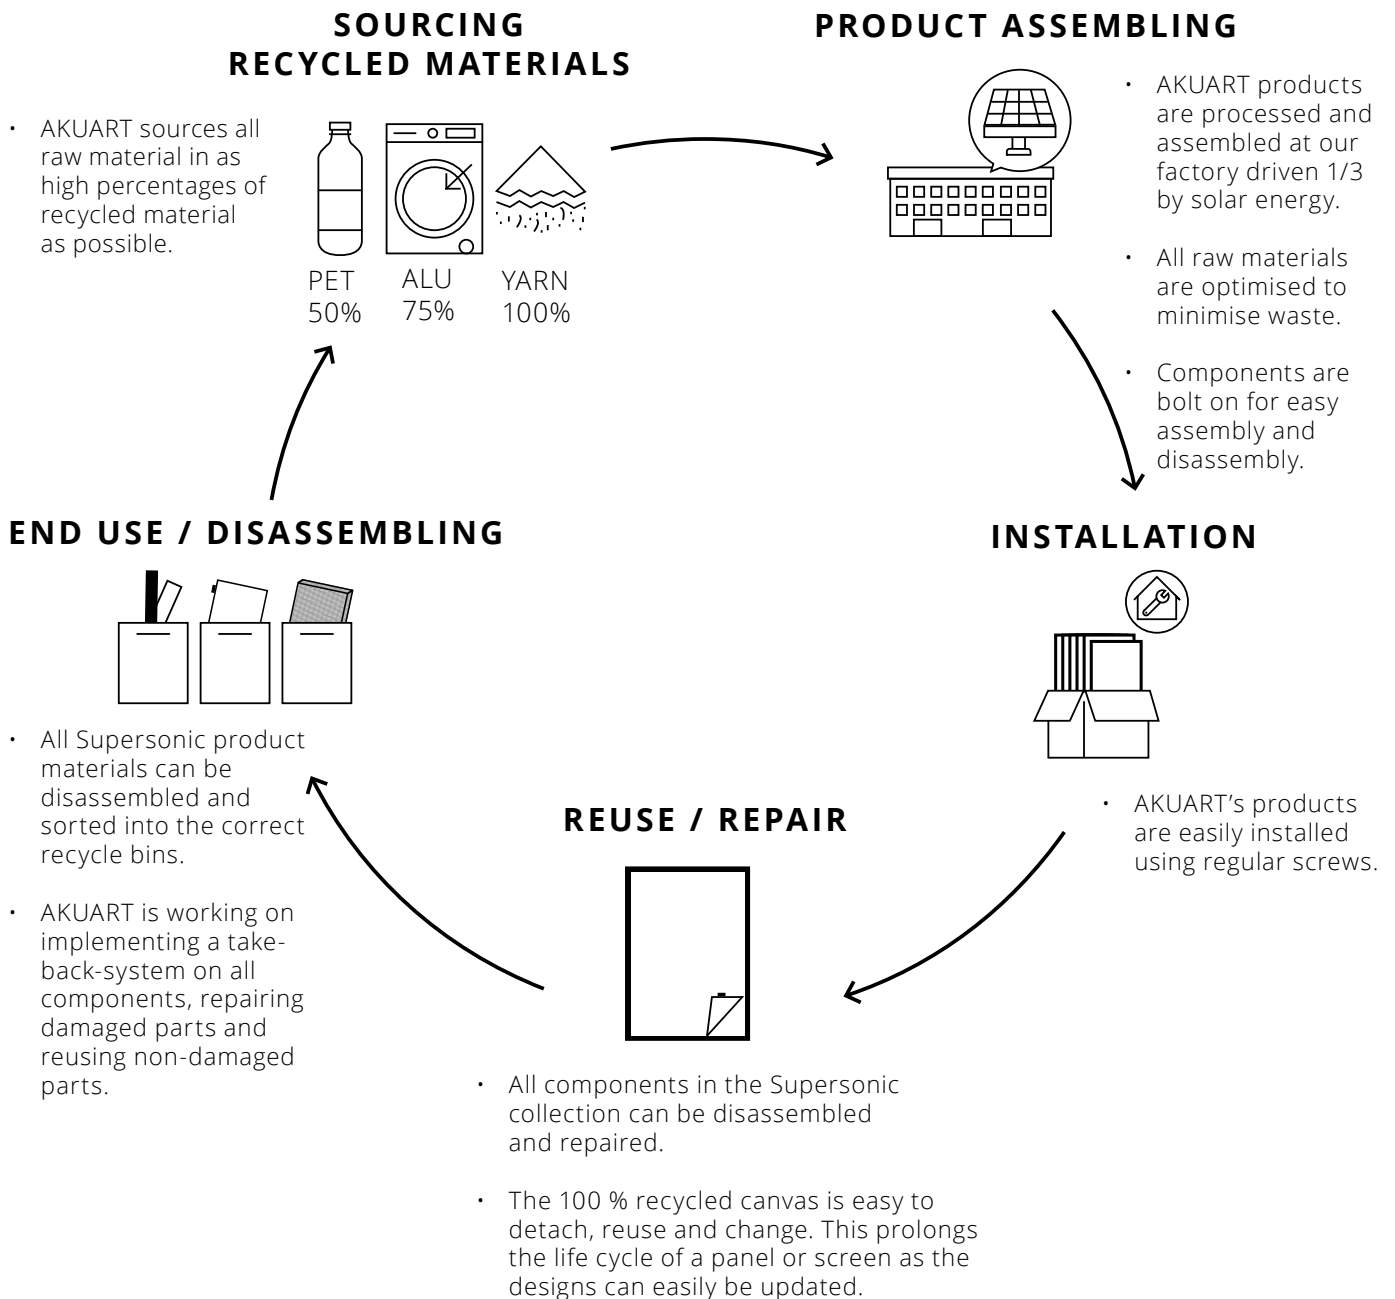

CIRCULAR DESIGN PRINCIPLES

REDUCE / REUSE / REPAIR /
RECYCLE / REMANUFACTURE

DESIGN FOR DISASSEMBLY

REDUCE — REUSE — REPAIR — RECYCLE — REMANUFACTURE

For our Supersonic collection we have incorporated the concept of designing for disassembly as fundamental principles that inform decisions and material choices. This guides us towards circularity and design to minimise waste by examining the supply chain in reverse and choosing components with similar life span, ensuring that products can be maintained, that parts can be recycled and replaced – and finally making disassembly and sorting uncomplicated and worthwhile.

Ambitious Climate Goals - working with the UN SDGs.

Material Transparency

We continuously strive to create products with a clean and functional design, made from the most sustainable components with the largest amount of recycled material available on the market.

“Sustainable transformation is an ongoing journey and we are excited for each step we take.”

Iben Garland Sonne, Sustainability Lead at Akuart

/ Aluminium frame consisting of 75% upcycled aluminium scrap, which can be fully recycled after use.

/ Canvases made from 100% recycled polyester fibres.

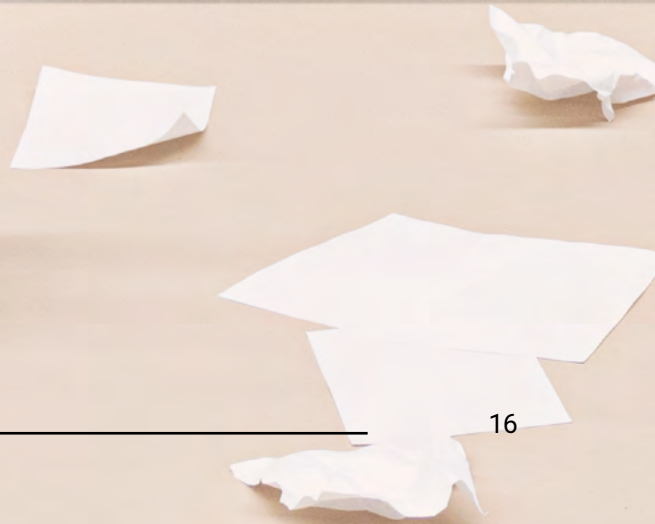

/ Sound absorber made with 50% fibres from plastic bottles recycled in Europe.

For the Supersonic collection we have calculated the full CO2 footprint for each individual product in the entire collection. For example, a 1000x1000 mm Supersonic wall panel emits 72 Kg Co2-e.

OUR COLLECTION

The Supersonic Collection is an exclusive range of acoustic wall panels and screens that raises the bar for responsible acoustic design and provides endless possibilities of creating beautiful, stylish and sensorially stimulating interior designs.

The entire Supersonic Collection has been designed with unique installation features. One of the features is the SS50 Wall Panel's shadow effect to counterbalance unlevel wall surfaces.

The collection comes with a variety of special features including the characteristic Akuart changeable canvas and a design for disassembly product philosophy making it possible to recycle each and every single component of the screen.

SUPERSONIC COLLECTION

DESIGN OPTIONS

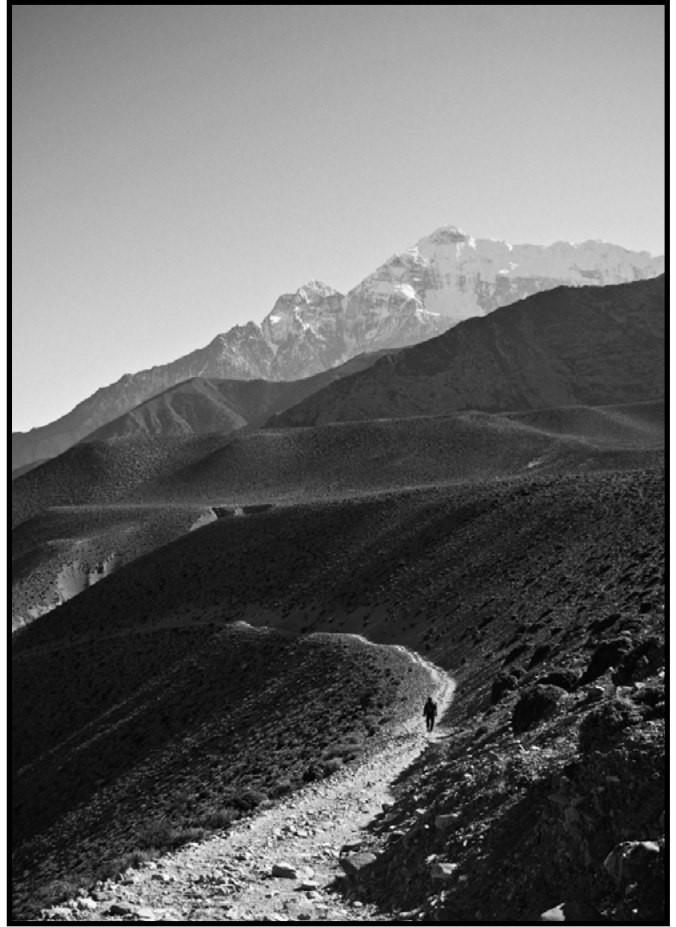

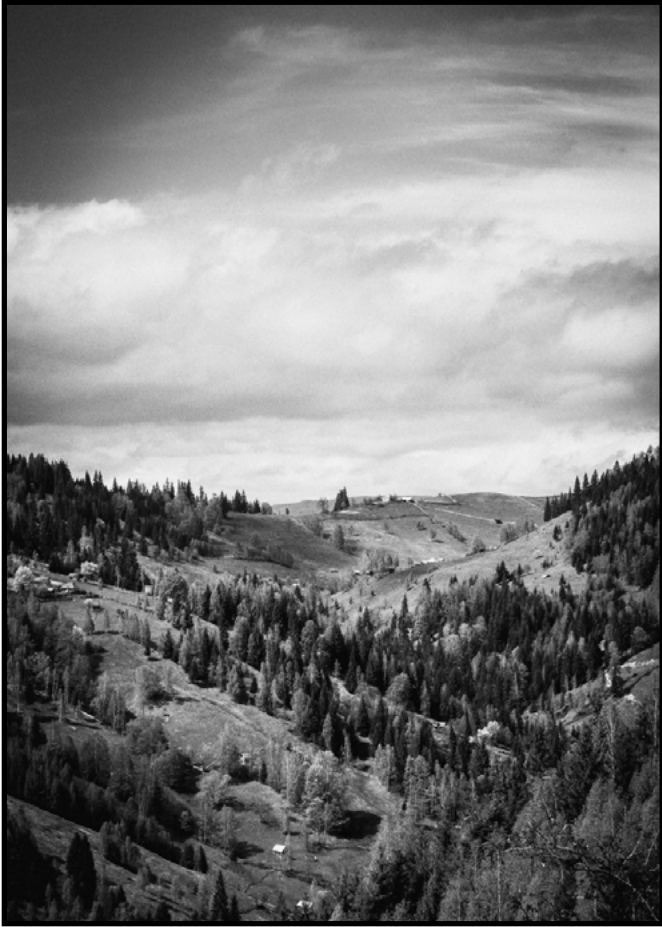

Colours & Textures

A collection of 9 frame options & more than 100 exclusive canvas colours

The Akuart changeable printed canvas offers a unique opportunity when it comes to creating a colourful office interior. With the Akuart Sound & Colours Collection you have 100+ colours to choose from with an additional choice to blend each and every colour with one of three different textures for a more tactile look and feel.

Extensive Artwork Gallery

In the exclusive Akuart gallery you will find curated artwork collections in a vast range of different categories e.g. art, photography, graphics, illustrations and more. This makes it possible for you to choose among thousands of unique pieces of artwork and get it printed on the changeable canvas of an Akuart sound absorbing panel.

COLOURS / SIGNAGE / WAYFINDING / BRANDING & CORPORATE IDENTITY

We believe that visual design is a strategic tool that helps create a positive impact on people. Whether it is wayfinding, finding the right colours, corporate identity or securing that personal touch, our philosophy is to ensure that our customers get the exact acoustic solution that matches their needs and wants. We never compromise on that.

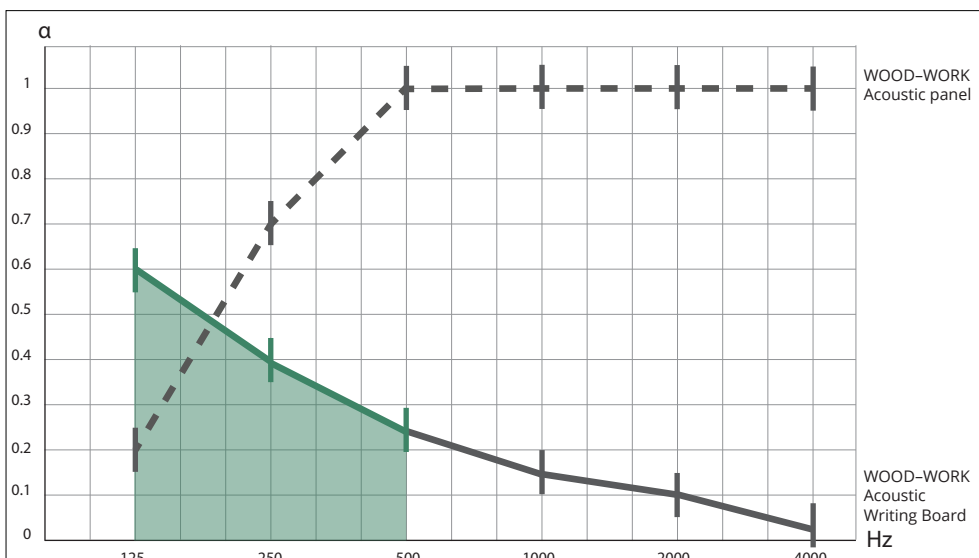

Planning & Organising

The Akuart x KBHavn Collection is a collaboration with Danish design company KBHavn. It is an exclusive and timeless collection of Akuart sound absorbents with changeable canvases fused with KBHavn's iconic calendar and time management designs. The changeable and recyclable pinnable Akuart canvas ensures that the calendar design can be renewed on a yearly basis without having to exchange the whole panel.

Allow us to introduce the Wood — Work Collection.

The Wood—Work Collection is engineered to be a full range high absorptive unit consisting of a high performance low frequency magnetic writing board membrane absorber and a class A porous sound absorbing wall panel with a pinnable function. By combining these two absorbers you are guaranteed a superior acoustic solution when creating beautiful, effective and functional acoustic design interiors.

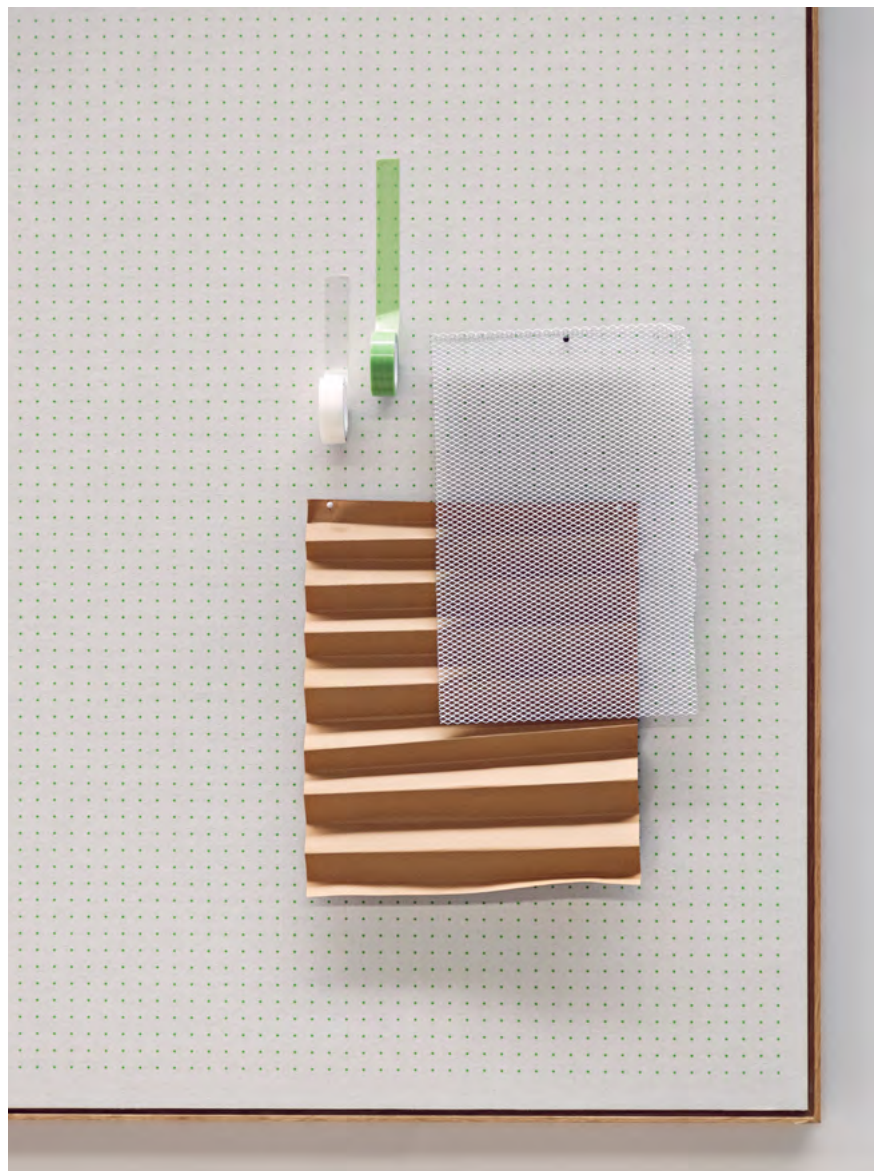

WOOD—WORK

“What makes the Wood—Work collection truly special is that we have designed the magnetic glass writing board as a highly effective low frequency membrane absorber which even outperforms more traditional porous absorbers in the low frequency range. This we have combined with a Class A acoustical panel.”

Steffen Spangmose, Acoustical Engineer and Product Lead at Akuart

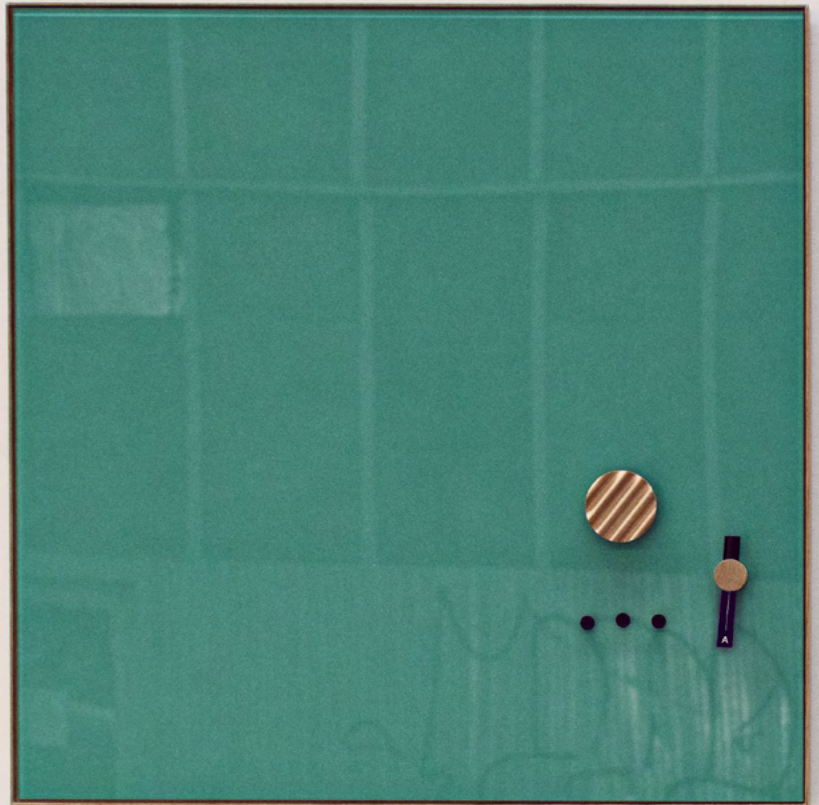

THE WOOD — WORK COLLECTION

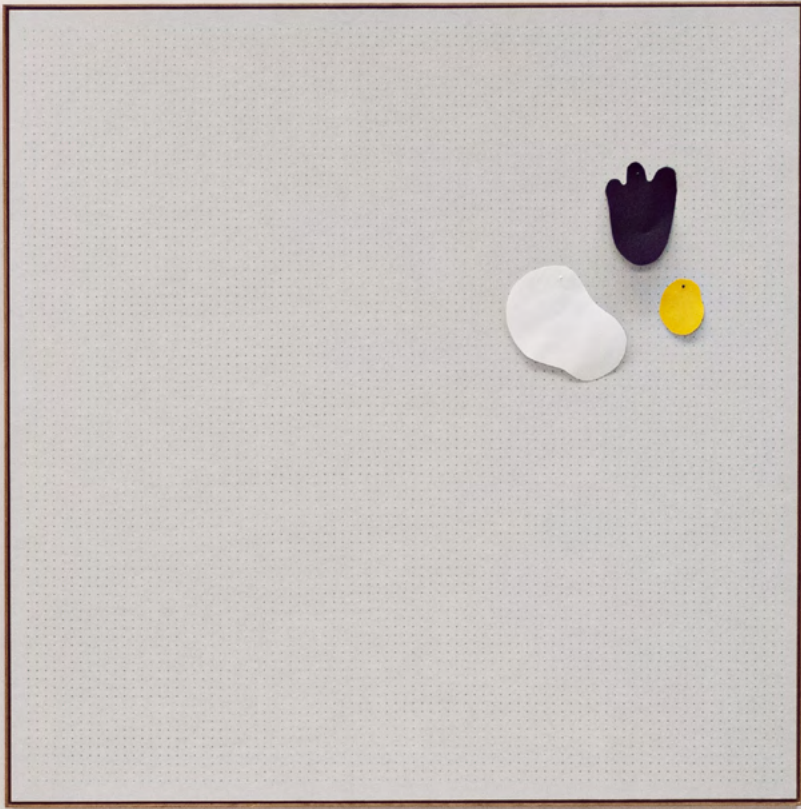

/ LEFT ACOUSTIC WRITING BOARD

The Wood-Work Acoustic Writing Board cleverly combines aesthetics and functionality. It is an intuitive tool for expressive minds that need to gather thoughts and people. Framed by exquisite oak, the magnetic writing board is a beautiful homage to our proud Nordic design tradition and mid-century functionalistic design. Thanks to our carefully curated range of playful colours, it will match any space, feeling, and demand. And yes, like all AKUART products, the board helps reduce sound reflections from the walls. This low frequency membrane absorber will make the workspace more comfortable and captivating at the same time.

/ RIGHT ACOUSTIC PANEL

The Wood-Work Acoustic Panel is a premium wall absorber. Framed by beautiful oak, the pinnable wall panel combines aesthetics and functionality. It is a natural tool, ideal for creative minds that need to build a mood board, gather people or maintain an overview of an ongoing project. The Wood-Work Acoustic Panel can match any room and mood with a curated range of playful colours and a grid or dot pattern, alluding to our proud Nordic tradition of functionalist design. And like all other AKUART products, this wall absorber also effectively reduces sound reflections.

MOJO PINBOARD

The Mojo Pinboard is an exceptionally effective broad frequency range acoustical pinboard that prevents unwanted sound from being reflected from wall surfaces. Designed in oak and natural linen, The Mojo Pinboard invites nature inside, stimulates the tactile senses and welcomes calm serenity into your workspace.

Mojo Pinboard
/ Frame - Oak,
/ Canvas - Linen

Art can stir up emotions and calm you down. It can inspire you to new ideas and help you rediscover the joy for old ones. It is the love of art that brought Akuart and Paper Collective together, to offer a unique curation of original art prints fused with great acoustic functionality.
